

Water Ski

Something new that I learned this summer was how to water ski. It took me a while to get up on the ski but when I did it I stayed up for a long time. It was really fun! My uncle's boat had the ski rope and the skis. I had to wear a life jacket and lay in the water while holding onto the ski rope. Then you have to let the boat pull you up and lean back.

The other thing that I did with the boat at my uncle's house was to ride on a tube. It was a tube that big and round and my cousin and I were on the tube at the same time. We both held on to the handles in the tube and the water kept splashing in our face. We went around the lake many times. At the end of the night my arms were really sore. I really liked all the things that we could do on the lake. It was fun.
