

Name _____

Date _____ Hour _____

Math Analysis & Trig.
Problem of the week- Due 09-19-2008

Directions: Print out this page and answer the following questions directly on that sheet of paper.

1. (10 points) Correct the problems you missed on your Trig Equations Quiz on a separate sheet of paper. Use your notes on it. After you are done doing that, attach your quiz and corrections to this page. On this paper, tell me how much time you spent on homework and studying for this quiz. Be honest! If you did not give it your all on this quiz, what can you do next time to ensure you get a better grade on subsequent quizzes? Do you think I should require you to do homework on a daily basis?

Andruch's Problem of the Week

- Mrs. Andruch is available to help you if you need it! If you need academic assistance during your Advisory, show up in room 236 with your ID card and you can ask math questions. Bring your homework and notes and come with questions! 😊
