

Addition Flash Cards

Attached to this note are some flashcards to help your child learn the addition facts from 0–18. Please study these flashcards each night as part of your child's homework. Starting in January (3rd Quarter), we will have weekly timed tests on these facts. Studying these facts now will make it easier on your child in January.

If you lose these, please don't hesitate to ask for another set. I have also placed them on our class website for easy access.
