

# Ice Cream Lab Recipe

Small Baggie:

1/2 cup milk

1/2 tsp. Vanilla

1 Tbsp. Sugar

Large Baggie:

4 cups ice

4 Tbsp. Rock salt (Morton sells it in the grocery store)

\*\* Remember to seal the small baggie REALLY well, so you don't get salt in the ice cream! Get as much air out of small baggie as possible.

\*\* You can use an old metal coffee can instead of the large baggie and shake or roll it across the floor. You just put the ice and salt in the coffee can, and then put the small baggie inside that.

GOOD LUCK!
