Order from least to greatest.

$$\frac{2}{3}km \quad 0.90km \quad \frac{3}{8}km \quad 0.55km$$

Allison, Raul, and Theo drove 1,224 miles from Austin to Los Angeles.

Allison drove $\frac{1}{3}$ of the distance, Raul drove 40% of the distance and Theo drove the remainder. How many miles were driven by the person who drove the greatest distance?
